01 / PROFESSIONAL SUMMARY

AI Engineer with a strong software engineering foundation in Python and backend development, focused on production-oriented Generative AI, RAG, and Document AI applications. Experienced in combining LLMs and computer vision with reliable APIs, asynchronous pipelines, typed validation, testing, observability, and maintainable architecture.

02 / CORE EXPERTISE

Generative AI Systems

LLM applications with modular providers, structured output, validation, and resilient integrations.

RAG & Semantic Search

Document ingestion, chunking, embeddings, vector search, retrieval, and grounded answer generation.

Document Intelligence

Multimodal extraction, page classification, PDF rendering, and schema-based structured delivery.

AI Backend Engineering

FastAPI services, background jobs, progress tracking, rate limiting, retries, logging, and testing.

03 / ENGINEERING FOCUS

- Backend foundation: Python, Django, REST APIs, relational databases, authentication, testing, Docker, and CI/CD.
- RAG systems: ingestion, chunking, embeddings, semantic retrieval, vector databases, and local LLM experimentation.
- Current focus: multimodal Document AI, intelligent extraction, asynchronous processing, and validated structured output.

Selected Projects & Technical Toolkit

Production-oriented AI systems backed by dependable software engineering

04 / SELECTED PROJECTS

01 Enterprise Document Intelligence & Structured Data Extraction

Designed an end-to-end FastAPI system for complex PDF intake, computer-vision page classification, Vision LLM extraction, typed validation, Celery/Redis processing, progress tracking, retries, logging, and monitoring.

FastAPI | Vision LLMs | OpenCV | Celery | Redis | PyMuPDF

02 Multimodal AI PDF-to-Markdown Processing Service

Built a modular service that renders PDF pages, processes them with a multimodal model, and produces structured Markdown with global rate limiting, resilient retries, cleanup, status endpoints, and automated tests.

FastAPI | Multimodal AI | Celery | Redis | Testing

03 Production-Oriented RAG Application

Implemented ingestion, chunking, embeddings, Qdrant semantic retrieval, and grounded answer generation, while exploring PostgreSQL, SQLAlchemy, Alembic, PGVector concepts, Ollama, Docker, and background processing.

RAG | Qdrant | Embeddings | PostgreSQL | Ollama

04 Food Recipes REST API

Developed a Django REST API with token/JWT authentication, CRUD, search, filters, pagination, image uploads, TDD, Docker, GitHub Actions CI, and Swagger/OpenAPI documentation.

Django REST | Docker | PostgreSQL | TDD | CI/CD

05 / TECHNICAL SKILLS

AI & Retrieval

Generative AI, LLMs, RAG, Document AI, Multimodal AI, Semantic Search, Embeddings, Qdrant, Local LLMs

Backend & Data

Python, FastAPI, Django, REST APIs, PostgreSQL, MongoDB, SQLAlchemy, Alembic

Processing & Delivery

Celery, Redis, Docker, OpenCV, PyMuPDF, GitHub Actions, CI/CD, Automated Testing

06 / EDUCATION & LANGUAGES

Cordoba Private University

Software and AI engineering foundation

Arabic

Native or bilingual proficiency

English

Professional working proficiency
